(b) The Company expects to recognize approximately \$4.1 million in pre-tax interest expense during the three months ending

January 23, 2016 for non-cash amortization of the debt discount associated with its 0.75% senior convertible notes.

The Company excludes the effect of this non-cash amortization in its Non-GAAP financial measures.

Explanation of Non-GAAP Financial Measures

The Company reports its financial results in accordance with U.S. generally accepted accounting principles (GAAP). In the Company's quarterly results releases, trend schedules, conference calls, slide presentations, and webcasts, it may use or discuss Non-GAAP financial measures, as defined by Regulation G of the Securities and Exchange Commission. The Company believes that the presentation of certain Non-GAAP financial measures in these materials provides information that is useful to investors because it allows for a more direct comparison of the Company's performance for the period reported with the Company's performance in prior periods. The Company cautions that Non-GAAP financial measures should be considered in addition to, but not as a substitute for, the Company's reported GAAP results. Management defines the Non-GAAP financial measures used in this release as follows:

- Non-GAAP Organic Revenues - contract revenues from businesses that are included for the entire period in both the current and prior year periods. Non-GAAP Organic Revenue growth (decline) is calculated as the percentage change in Non-GAAP Organic Revenues over those of the comparable prior year period. Management believes organic growth (decline) is a helpful measure for comparing the Company's revenue performance with prior periods.
- Non-GAAP Adjusted EBITDA - net income before interest, taxes, depreciation and amortization, gain on sale of fixed assets, stock-based compensation expense, loss on debt extinguishment, and certain non-recurring items. Management believes Non-GAAP Adjusted EBITDA is a helpful measure for comparing the Company's operating performance with prior periods as well as with the performance of other companies with different capital structures or tax rates.
- Non-GAAP Adjusted Net Income - GAAP net income before loss on debt extinguishment, non-cash amortization of

the debt discount, certain non-recurring items and any tax impact related to these items, and "Non-GAAP Adjusted Diluted Earnings per Common Share" as Non-GAAP Adjusted Net Income divided by weighted average diluted shares outstanding. Management excludes or adjusts each of the items identified below from Non-GAAP Adjusted Net Income and Non-GAAP Adjusted Diluted Earnings per Common Share:

- - Non-cash amortization of the debt discount - The Company's 0.75% senior convertible notes due 2021 (the "Notes") were allocated between debt and equity components. The difference between the principal amount and the carrying amount of the liability component of the notes represents a debt discount. The debt discount will be amortized over the term of the notes but will not result in periodic cash interest payments. During the quarter ended October 24, 2015, the Company recognized approximately \$1.8 million in pre-tax interest expense for non-cash amortization of the debt discount associated with the Notes. The Company has excluded the non-cash amortization of the debt discount from its Non-GAAP financial measures because it believes it is useful to analyze the component of interest expense for the Notes that will be paid in cash. The exclusion of the non-cash amortization from the Company's Non-GAAP financial measures provides management with a consistent measure for assessing financial results.
- - Loss on debt extinguishment - The Company incurred a pre-tax charge of approximately \$16.3 million for early extinguishment of debt in connection with the redemption of its 7.125% senior subordinated notes on September 15, 2015. Management believes excluding the loss on debt extinguishment from the Company's Non-GAAP financial measures assists investors' overall understanding of the Company's current financial performance. The Company believes this type of charge is not indicative of its core operating results. The exclusion of the loss on debt extinguishment from the Company's Non-GAAP financial measures provides management with a consistent measure for assessing the current and historical financial results.
- - Tax impacts of adjusted results - The tax impact of the adjusted results for the quarter ended October 24, 2015 was calculated utilizing a Non-GAAP effective tax rate which approximates the Company's effective tax rate used for financial planning. The tax impact included in the Company's guidance for the quarter ended January 23, 2016 was calculated using an effective tax rate used for financial planning and forecasting future results.
