Non-GAAP Adjusted Net Income (Loss)

In fiscal 2021 and fiscal 2022, the Company excluded certain tax impacts from the vesting and exercise of share-based awards when calculating Non-GAAP Adjusted Net Income (Loss). For comparability to other companies in the industry, the Company no longer excludes these tax impacts from its Non-GAAP measures beginning with the results for the first quarter of fiscal 2023. As there are no Non-GAAP adjustments for the first six months of fiscal 2023, Non-GAAP Adjusted Net Income for the quarters ended April 30, 2022 and July 30, 2022 equals GAAP net income presented in the table below.

For comparability to other companies in the industry, the Company no longer excludes these tax impacts from its Non-GAAP measures beginning with the results for the first quarter of fiscal 2023. As there are no Non-GAAP adjustments for the first six months of fiscal 2023, Non-GAAP Adjusted Net Income equals GAAP net income for the quarters ended April 30, 2022 and July 30, 2022. Additionally, for the quarter ended April 25, 2020, the Company recognized an income tax benefit of \$2.6 million from a net operating loss carryback under the enacted U.S. Coronavirus Aid, Relief, and Economic Security (CARES) Act.

¹³ The Company's backlog represents an estimate of services to be performed pursuant to master service agreements and other contractual agreements over the terms of those contracts. These estimates are based on contract terms and evaluations regarding the timing of the services to be provided. In the case of master service agreements, backlog is estimated based on the work performed in the preceding 12 month period, when available. When estimating backlog for newly initiated master service agreements and other long and short-term contracts, the Company also considers the anticipated scope of the contract and information received from the customer during the procurement process. A significant majority of the Company's backlog comprises services under master service agreements and other long-term contracts. Backlog is not a measure defined by United States generally accepted accounting principles ("GAAP") and should be considered in addition to, but not as a substitute for, GAAP results. Participants in the Company's industry often disclose a calculation of their backlog; however, the Company's methodology for determining backlog may not be comparable to the methodologies used by others. Dycom utilizes the calculation of backlog to assist in measuring aggregate awards under existing contractual relationships with its customers. The Company believes its backlog disclosures will assist investors in better understanding this estimate of the services to be performed pursuant to awards by its customers under existing contractual relationships.
