Accordingly, for Non-GAAP Adjusted Diluted Earnings per Common Share calculations, the Company expects to present results per share that exclude the dilutive effect of the Notes, if any, based on the expected effect of the note hedge.

RECONCILIATION OF NON-GAAP FINANCIAL MEASURES
TO COMPARABLE GAAP FINANCIAL MEASURES (CONTINUED)

Explanation of Non-GAAP Financial Measures

The Company reports its financial results in accordance with U.S. generally accepted accounting principles (GAAP). In the Company's quarterly results releases, trend schedules, conference calls, slide presentations, and webcasts, it may use or discuss Non-GAAP financial measures, as defined by Regulation G of the Securities and Exchange Commission. The Company believes that the presentation of certain Non-GAAP financial measures in these materials provides information that is useful to investors because it allows for a more direct comparison of the Company's performance for the period reported with the Company's performance in prior periods. The Company cautions that Non-GAAP financial measures should be considered in addition to, but not as a substitute for, the Company's reported GAAP results. Management defines the Non-GAAP financial measures used in this release as follows:

- *Non-GAAP Organic Contract Revenues* - contract revenues from businesses that are included for the entire period in both the current and comparable prior periods, excluding contract revenues from storm restoration services. Non-GAAP Organic Contract Revenue growth is calculated as the percentage change in Non-GAAP Organic Contract Revenues over those of the comparable prior year periods. Management believes organic growth is a helpful measure for comparing the Company's revenue performance with prior periods.
- *Non-GAAP Adjusted EBITDA* - net income before interest, taxes, depreciation and amortization, gain on sale of fixed assets, stock-based compensation expense, and certain non-recurring items. Management believes Non-GAAP Adjusted EBITDA is a helpful measure for comparing the Company's operating performance with prior periods as well as with the performance of other companies with different capital structures or tax rates.
- *Non-GAAP Adjusted Net Income* - GAAP net income before the non-cash amortization of the debt discount and the related tax impact, certain tax impacts resulting from vesting and exercise of share-based awards, and certain non-recurring items.
- *Non-GAAP Adjusted Diluted Earnings per Common Share and Non-GAAP Adjusted Diluted Shares* - Non-GAAP Adjusted Net Income divided by Non-GAAP Adjusted Diluted Shares outstanding. The Company has a note hedge in effect to offset the economic dilution of additional shares from the Notes up to an average quarterly share price of \$130.43. The measure of Non-GAAP Adjusted Diluted shares used in computing Non-GAAP Adjusted Diluted Earnings per Common Share excludes dilution from the Notes. Management believes that the calculation of Non-GAAP Adjusted Diluted shares to reflect the note hedge will be useful to investors because it provides insight into the offsetting economic effect of the hedge against potential conversion of the Notes.

Management excludes or adjusts each of the items identified below from *Non-GAAP Adjusted Net Income* and *Non-GAAP Adjusted Diluted Earnings per Common Share*:

- *Non-cash amortization of the debt discount* - The Company's Notes were allocated between debt and equity components. The difference between the principal amount and the carrying amount of the liability component of the Notes represents a debt discount. The debt discount is being amortized over the term of the Notes but does not result in periodic cash interest payments. The Company has excluded the non-cash amortization of the debt discount from its Non-GAAP financial measures because it believes it is useful to analyze the component of interest expense for the Notes that will be paid in cash. The exclusion of the non-cash amortization from the Company's Non-GAAP financial measures provides management with a consistent measure for assessing financial results.
- *Tax impact of excess tax benefits or deficiencies* - The Company excludes certain tax impacts resulting from vesting and exercise of share-based awards as these amounts may vary significantly from period to period. Excluding these amounts from the Company's Non-GAAP financial measures provides management with a more consistent measure for assessing financial results.
- *Tax impact of adjusted results* - The tax impact of adjusted results reflects the Company's effective tax rate used for financial planning for the applicable period.
